

4 March 1964

MEMORANDUM FOR: Director of Personnel

SUBJECT : Career Services

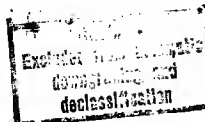

25X1A

A review of the Career Service grade authorization data produced quarterly by Mr. [REDACTED] office raises the following questions:

1. Why is there so much headroom which is not being used by most Career Services and especially at the middle grades?
2. Does this mean that the grade structure is inflated in some cases, or that we are using lower salaried people to perform some higher salaried jobs?
3. Why does the Clandestine Services Career Service seem to have ^{so} as much headroom, especially in the middle and upper grades?
4. Is a reclassification study indicated for each Career Service or in some components?
5. What in your judgement is a reasonable percentage of headroom to give a Career Service flexibility?
6. Does the Office of Personnel analyze these data periodically and make recommendations to the heads of Career Services for adjustments?
7. Do you think that the present role of the Office of Personnel in the Career Service machinery is about right? What changes, if any, would you recommend?
